MLSA Hackocalypse Winner 2024 ☐

Projects

E-commerce   05/2025 – present
This is a full-featured **E-commerce web application** developed using the **MERN stack** with a focus on performance, scalability, and user experience. The frontend is built using **React** with component-based architecture, and the backend uses **Node.js** with **Express** for API handling and **MongoDB** as the NoSQL database.

Portfolio ☐   12/2024
Improved front-end development skills by working directly with core web technologies
Enhanced understanding of responsive design principles
